TREE PEONIES

King of Flowers

Ancient Chinese called the tree peony, the King of Flowers. They lend charm to the garden because they are beautiful, rare and hardy.

These shrubby counterparts of the familiar perennial are distinguished principally by their woody stems but usually they are taller with bigger flowers and they begin to blossom two or three weeks earlier than ordinary peonies. These spectacular shrubs grow to a height of three to four feet.

Once a tree peony has been seen in full bloom, many other plants will seem unattractive by contrast. The immense beautiful blossoms display graceful, often crinkled petals, which sometimes look as if they were made of crepe paper. All varieties have a delicious fragrance. The shapely, fine cut leaves of these majestic shrubs suggest an appearance of tropical luxuriance.

Since the branches do not die back to the ground in winter as do those of softstemmed kinds, tree peonies are able to put forth buds in fall. They thus develop faster than other, species in Spring and by the time they are several years old, are capable of blooming in great profusion. After the flowering period, the new sprouts gradually turn to wood during the summer. Buds form on this wood and the process continues.

GARDEN ACCENT

A tree peony is a notable plant and may well be given a place of honor. A single specimen can hold the focal point in an intimate garden. Two make handsome accents on each side of steps or the entrance path. Four can be used in a balanced design at the corners of a flagged area or of a rectangular pool.

A group of these plants is spectacular if backed by lilacs. In bloom together, the shrubs and peonies may well be the most colorful section of the garden.

The peony shrubs originally grew wild in the mountains of China. They were imported into Japan and also, about 150 years ago, into Europe. On both continents, hybridizers have been at work improving them.

TYPES — COLORS

At the present time, three distinct types can be distinguished—the European, the Japanese and lutea hybrids. The European type is usually very double and has broad foliage. Japanese tree peonies have single to mostly semi-double blooms, nearly always with a beautiful cushion or circle of yellow stamens in the center. Leaves are much finer and thinner than in the European. The lutea hybrids originated from a cross between the wild lutea and the other oriental varieties. These lutea hybrids are difficult to propagate and very rare.

The colors of both European and Japanese tree peonies range from pure white through pale pink, rose, salmon and cerise to deepest red. The Japanese have a much broader range than the European. Lutea hybrids display colors and shades all their own. Yellow ranging from clear tones to orange tints, vie for the visitor's attention with combinations of yellow and red. Some of these are unsurpassed even by the rose. In the Japanese there are clear whites, pinks, salmons, reds and maroons that cannot be described in words. The daintiness of the semi-doubles and the airiness and sparkle of the full double beggar description.

Tree peonies begin to flower in this area about May 15th to 20th. The lutea hybrids open last, about May 20th to 30th. Some varieties lend themselves to forcing. All are easy to grow in most parts of the country. They have been known to survive winter temperatures of twenty to thirty degrees below zero and will endure more neglect the year round than most plants.

CULTURE

Though it is almost impossible to kill a tree peony by neglect, a little attention means better flowers and a handsome shrub. Well-drained soil is to be preferred and sunlight for the greater part of the day.

If they are set rather deeply in the ground, they will be induced to produce new shoots or sprouts from the roots, thus a bigger shrub will result. They need four-foot spacing, since fully grown specimens are that high and almost as wide. Steamed bone meal or a commercial fertilizer low in nitrogen but high in phosphoric acid and potash are most commonly used. Manure is inadvisable for any peony.

Since the plants are hardy, they need no protection after the first winter. Young specimens, however, should be covered with leaves or any other protective cover. In severe winters, an occasional limb may be killed by extremely cold winds but this does not affect the rest of the plant. The dead wood can simply be cut off in Spring. Although subject to no serious disease, specimens may be threatened by botrytis. If a branch suddenly wilts and droops, it should be broken off. The shrub will continue to grow. Botrytis seldom kills a tree peony. Spraying with Bordeaux during the early growing stages will act as a deterrent.

This list represents the finest collection of tree peonies ever offered in this country—some varieties have never been offered before. We are the largest importers of tree peonies and our collections are most complete. We regard the Japanese varieties vastly superior in beauty and freedom of bloom. Of the European listed, we regard them as the best. Lutea are excellent growers and have been known to bloom from a two year old plant.

We have many other varieties, young and specimen sizes, in small quantities—not enough to list—try us for varieties you seek.

Deliveries will be made in the late Fall at proper planting time.

Special discount of 5% on orders over \$50.00.

It is advisable to purchase young plants 2 to 3 years—although small, they are vigorous and may bloom the first Spring after planting, surely the following Spring. If you want good established plants which have bloomed, buy our specimen sized plants 4 to 10 years—all best quality. Unless you are familiar with the various varieties, we suggest you allow us to make the selection—we guarantee complete satisfaction. Tree peonies are so scarce, the supply is not sufficient to meet the demand. We suggest naming a second choice or granting us the privilege of substituting an equal or better value. If nothing is said, we will do so.

We have small quantities of plants unidentified because of lost labels. We offer these at \$3.00 for young and \$5.00 for specimen size.

Terms—Cash with order—FOB Brookville, L. I., N. Y.

All better collectors, hobbyists and specialists are our customers.

TREE PEONY SEEDS

For the first time in many years these rare, finest of all seeds are available. They have been carefully selected from the best Japanese varieties,—no seeds from seedlings, all from named varieties.

Everyone should grow Tree Peonies from seed. Buy them while the supply lasts.

Price \$5.00 per 100—shipped in Fall or Spring.

SPECIAL NOTICE

We take great pleasure in announcing our good fortune in purchasing the best, rare old specimen plants 30 to 40 years old, from the world famous Japanese temples. The gardens of these Temples, visited by Shoguns and Emperors for centuries, are now in charge of a Buddhist priest, who consented to ship these giant specimens to us. These are all in good condition and will transplant readily—proper precautions have been taken for shipping.

This is an opportunity for you to purchase these rare, old specimens at the very low price of \$20.00 each. Quantity limited.

Some of the outstanding varieties are Gessekai, Kenreimon, Nissho, Senyomon, Yomeimon Akasha jishi, Haku raku ten, Kagura jishi, Shichi fuku jin, Fuso no tsukasa, Iwato kagami, Adzuma shibori, Koku ryu nishiki, Haru geshiki, Okina jishi, Tama fuyo, Setsu gekka, Taisho nishiki, Yae Zakura.

Delivery this Fall.

JAPANESE VARIETIES

	l'oung	Specimen
ABOKIU (Imperial Palace)—Excellent dark crimson, beautiful semi-double	\$9.00	
AKUTSUKI NO YUKI (Snow uder waning moon)—Light pink, semi-double	7.00	
ASAHI (Rising Sun)—Medium sized beauty, brilliant scarlet		
ADZUMA KAĞAMİ (Mirror of the East)—Fine lilac rose double-good variety		
ANKAMON (No translation)—Large watermelon pink, semi-double, excellent	7.50	
ARASHI YAMA (Maple mountain)—Russet tinged rose, double, very large	7.50	\$12.00

We are pleased to list the scarce tree peonies grafted on tree peony roots. These are vigorous young plants on massive heavy roots and as a result, they produce much larger flowers. This is an unusual opportunity to obtain tree peonies which will be priceless as they get o'der. Only the following varieties are available at \$15.00 each, except the Luteas at \$20.00 each:

Gessekai, Hanakisoi, Rimpo, Ubatama, Jimpu, Daigyokuden, Gumbow, Kenreimon, Horakumon, Genkimon, Kokamon, Ima shojo, Taioh.

Luteas: Souvenir de Maxime Cornu, La Lorraine and Chromatella.

TREE PEONY SPECIES

LUTEA—TIBETAN FORM—new tree peony species—brilliant yellow with blooms high above foliage. Greatest advance in hybridizing will result from crossing on this variety.

Young plant—\$15.00

LUTEA—SHERRIFF'S VARIETY—Buttercup yellow tree peony species with beautiful foliage—superb variety—greatly superior to the type—\$8.00.

HERBACEOUS PEONIES

In the following list we offer the best of peonies for the expert, the collector and the back yard grower. The selections are those which have proven to be hardy, easy growers and will be found to be the best of the cut flowers and exhibition varieties. We offer excellent 3 to 5 eye divisions with well-balanced root systems, at prices consistent with quality of roots. We can supply any peony in commerce, not listed. Send us your required list.

Special collections for beginners, exhibition and cut flower varieties at reduced prices. Types are double, semi-double, Japanese and single.

Double—are full double or have stamens that are not prominent.

Semi-double—show prominent stamens with several rows of guard petals and center of yellow stamens.

Japanese—one to three rows of guard petals and center of staminodes usually yellow or edged and tipped yellow. Stamens partially transferred into petals. Very attractive.

Single—one to two rows of guard petals with center of yellow pollen bearing stamens and anthers, graceful and artistic.

The peony is easy to grow, needs no coddling and increases in value the older it gets. It is famous for its fragrance and general beauty. Peony culture is simple. Dig a hole about 12 to 18 inches deep and about as wide. The plant should be inserted in the hole, so that the eyes will be about two inches below the surface. Fill in the soil around the plant, firmly packing soil about the roots. Water well before hole is filled. Cultivate frequently until early Fall. The best planting time is from September 1st until December 1st.

The soil should be of ordinary garden variety, the same type used for annuals and perennials. When planting, use super phosphate or bone meal. Manure is to be used only when completely dried and only in bottom of the hole. A bordeaux spray in April and May will help the plant along.

Terms-Cash with order-Shipment this Fall, F. O. B. Brookville, L. I., N. Y.

Orders for \$5.00 or more delivered free.

EXCLUSIVE HERBACEOUS PEONIES

Experts in Japan have been writing continuously about a genuine, full double, pure YELLOW HERBACEOUS peony, which they have named "Aurea." It was first found by a well-known nursery, who entrusted its growing to Japan's foremost expert on herbaceous peonies, who grew it in limited quantities. The few plants were sold to various fanciers and our agent was fortunate in obtaining a few plants at great cost. We are offering twelve plants at \$35.00 each, delivery October.

ANOTHER EXCLUSIVE

After three years of effort, two of the best peony experts in Japan, selected the six outstanding herbaceous peonies there. We are fortunate to offer them in limited quantity. Growers description below:

IKUENOYUKI—Snow white full double, enormous flower, flowering stems are very strong, excellent for cut flowers.

HYOGO-JIMAN (Pride of Hyogo)—Vermillion (cinnabar) full double, brilliant large flower.

HAKUSA-SEISHO-Snow white, full double, in the middle shaded blue, very large, beautiful.

NAGAO-NO-TAKARA (Treasure of Nagao)—Very thick lustrous blackish purple crimson, full double, big flower.

SONO-ONOSAKAE—Velvety blackish crimson, full double, giant flower.

NARA-NO-YADA-Light vermillion like Chinese lacquer, full double, brilliant flower.

PRICE \$5.00 each.

EXCLUSIVE — EIGHT NEW HERBACEOUS VARIETIES — EUROPEAN SHOW WINNERS

All are 1950 introductions, raised and selected about twenty years ago, tested thereafter for strength of stem, general vigor and freedom of bloom.

The color descriptions given are of the Color-chart of the Royal Horticultural Society, London, England. Shown at progressive Peony Show at Boskoop, Holland, in June 1949; the only exhibit which received a Gold Medal.

Shown at the R. H. S. Show, London, England and all selected for trial at Wisley by the R. H. S. Committee. Shown at Haarlem, Holland, June 1949 and awarded first class certificates by a special Committee.

BLUSH QUEEN: A lovely creamy white double peony, tinted very slightly rose, free flowering, excellent substance—\$5.00.

BORDER GEM: A distinct, bushy and compact growing peony. Outer petals shrimp-red (HCC 161/3), inner petals chartreuse-green (HCC (663/3). A real gem for the flower border—\$5.00.

BOWL OF BEAUTY: Very fine Japanese type. The larger outer petals are fuchsia rose (HCC 25/2) and the inner small teethed petals are of a pa'e lemon yellow color (HCC 601/3). The flowers are 6-8 inches on strong stems. The best variety of this type is Mrs. Hemerik and it is a great improvement on that variety—\$6.00.

VOGUE: Indeed a delightful variety, very soft rose with a silvery white reflex. Exceptionally large flowers, full double—\$5.00.

GAYBORDER JUNE: Another free flowering full double vigorous new peony. Flowers fuchine rose, thickly petalled, a perfect variety for the flower market and for exhibition—\$6.00.

SNOW CLOUDS: Ivory white, base of petals empire yellow as of Adonis (HSS 603/3). When opening very slightly rose shaded, outstanding double—\$5.00.

PETER BRAND: Large, full double, ruby red, sparkling petals of fine texture—full divisions. \$6.00 each. Delivery September-October. Very few divisions available.

WHITE WINGS: An enormous, graceful, pure white single, beautiful yellow center, largest single of all—\$5.00. We offer entire collection for \$35.00.

Higo Strain

Three of the largest growers in Japan collaborated on the selection of the best Higo Iris—this strain is superior to all others. After two seasons of close study, these experts selected the following lists from hundreds of varieties. Twenty-five of this list are new introductions since the war and these, in addition to at least another thirty, have never before been shipped to this country. These should not be confused with the ordinary quality Higo Iris strain of Iris Kaempferi, which were exported to this country by unscrupulous dealers, given some of the names in this list and now being sold at low prices in this country.

Our Iris are all truly named, superior to any list ever offered. This collection will create excitement among Iris Kaempferi fanciers because of their brilliance of color, size and refinement of blooms and plant growth. These will create new standards by which all Iris Kaempferi of the future will be compared.

Original description of each variety, as given by the Japanese growers.

AZALEAS — RARE

EXBURY HYBRIDS—Raised in the world famous gardens at Exbury, England, by the late Mr. Lionel de Rothschild. These are the finest Hardy Azaleas in the world far superior to any other strain. Their magnificent flower trusses are in the glorious shades of cream, yellow, orange, apricot, flame, pink, rose, crimson and scarlet. The plants are of robust habit, reaching a height of 5 to 7 feet.

9 to 12 inches fine plants \$4.75 each

We are fortunate to be the first to offer these in this country. Delivery next April-limited quantity-available supply will be sold quickly—we suggest your order immediately.

GHENT HYBRIDS—HARDY—These famous azaleas will be delivered in April—we have sold thousands in this country—their exquisite, big flowers in pastel shades, many fragrant, have made them very popular.
